

Attendance System Auth Permissions Handoff

Permission, task, action and role setup for hosted CECB_Auth.

Prepared date	2026-07-02
Target auth DB	CECB_Auth
System code	ATTENDANCE
Seed script	AttendanceSystem.API\DatabaseScripts\SeedAttendanceAuthPermissions.sql
Permission format	ATTENDANCE.{TASK}.{ACTION}

This document is for the system engineer who will add Attendance System permissions into the hosted central Auth system. The seed script is idempotent. It can be reviewed and run against CECB_Auth ; it creates or updates the system, tasks, actions, task-actions, roles and role-permission mappings.

Setup Summary

- Create or update central auth system: ATTENDANCE .
- Create Attendance tasks and actions listed below.
- Create task-action permissions listed below.
- Create roles: ATTENDANCE_ADMIN , ATTENDANCE_AGM , ATTENDANCE_CLERK , ATTENDANCE_EMPLOYEE .
- Assign users to the correct Attendance role.
- For AGM and Clerk users, add UserWorkUnit assignments so the Attendance API can filter their assigned section/work unit data.
- Configure Attendance API CentralJwtSettings.SecretKey with the same JWT secret used by central Auth.

System

Field	Value
SystemCode	ATTENDANCE
SystemName	Attendance System
Subtitle	Attendance and Leave Information Management System
BaseUrl	Use hosted Attendance API URL. Local seed default is http://localhost:5050/api .
UiUrl	Use hosted Attendance UI URL. Local seed default is http://localhost:3000 .

Tasks

TaskCode	TaskName	Purpose
DASHBOARD	Dashboard	Dashboard summary and charts.
MY_ATTENDANCE	My Attendance	Employee own attendance view.
SECTION_ATTENDANCE	Section Attendance	AGM/Clerk assigned section attendance.
ALL_ATTENDANCE	All Attendance	Admin all attendance view.
EMPLOYEES	Employees	Employee list and search.
REPORTS	Reports	Employee, monthly, daily and late reports.
OT_SUMMARY	OT Summary	Overtime summary report.
ATTENDANCE_REGISTER	Attendance Register	Monthly attendance register.
ANALYTICS	Analytics	Attendance analytics view.
SOURCE_STATUS	Source Status	Attendance data source status.
CACHE	Cache	Refresh schedule/cache data.
SETTINGS	Settings	Admin settings/user management capability.

Actions

ActionCode	ActionName	Meaning
VIEW_OWN	View Own	Can view only the logged-in employee's own data.
VIEW_ASSIGNED	View Assigned	Can view assigned work unit or section data.
VIEW_ALL	View All	Can view all attendance data.
EXPORT	Export	Can export report data.
PRINT	Print	Can print report data.
REFRESH	Refresh	Can refresh cache/source data.
MANAGE	Manage	Can manage settings/users.

Task-Actions

Permission Code	Notes
ATTENDANCE.DASHBOARD.VIEW_ASSIGNED	Assigned-scope dashboard.
ATTENDANCE.DASHBOARD.VIEW_ALL	Admin dashboard.
ATTENDANCE.MY_ATTENDANCE.VIEW_OWN	Employee own attendance.
ATTENDANCE.SECTION_ATTENDANCE.VIEW_ASSIGNED	Assigned section attendance.
ATTENDANCE.ALL_ATTENDANCE.VIEW_ALL	All attendance records.
ATTENDANCE.EMPLOYEES.VIEW_ASSIGNED	Assigned employee list.
ATTENDANCE.EMPLOYEES.VIEW_ALL	All employee list.
ATTENDANCE.REPORTS.VIEW_OWN	Own reports.
ATTENDANCE.REPORTS.VIEW_ASSIGNED	Assigned reports.
ATTENDANCE.REPORTS.VIEW_ALL	All reports.
ATTENDANCE.REPORTS.EXPORT	Export reports.
ATTENDANCE.REPORTS.PRINT	Print reports.
ATTENDANCE.OT_SUMMARY.VIEW_OWN	Own OT summary.
ATTENDANCE.OT_SUMMARY.VIEW_ASSIGNED	Assigned OT summary.
ATTENDANCE.OT_SUMMARY.VIEW_ALL	All OT summary.
ATTENDANCE.OT_SUMMARY.EXPORT	Export OT summary.
ATTENDANCE.OT_SUMMARY.PRINT	Print OT summary.
ATTENDANCE.ATTENDANCE_REGISTER.VIEW_ASSIGNED	Assigned attendance register.
ATTENDANCE.ATTENDANCE_REGISTER.VIEW_ALL	All attendance register.
ATTENDANCE.ATTENDANCE_REGISTER.EXPORT	Export register.
ATTENDANCE.ATTENDANCE_REGISTER.PRINT	Print register.
ATTENDANCE.ANALYTICS.VIEW_ASSIGNED	Assigned analytics.
ATTENDANCE.ANALYTICS.VIEW_ALL	All analytics.
ATTENDANCE.SOURCE_STATUS.VIEW_ALL	Admin source status.
ATTENDANCE.CACHE.REFRESH	Admin cache refresh.
ATTENDANCE.SETTINGS.MANAGE	Admin settings/users.

Roles And Permissions

RoleCode	Use For	Permissions
ATTENDANCE_ADMIN	Attendance admins. Full attendance data access and admin tools.	All task-actions listed in this document. Expected active permission count: 26 .
ATTENDANCE_AGM	AGM users. They should see assigned work unit or section data only.	DASHBOARD.VIEW_ASSIGNED, SECTION_ATTENDANCE.VIEW_ASSIGNED, EMPLOYEES.VIEW_ASSIGNED, REPORTS.VIEW_ASSIGNED, REPORTS.EXPORT, REPORTS.PRINT, OT_SUMMARY.VIEW_ASSIGNED, OT_SUMMARY.EXPORT, OT_SUMMARY.PRINT, ATTENDANCE_REGISTER.VIEW_ASSIGNED, ATTENDANCE_REGISTER.EXPORT, ATTENDANCE_REGISTER.PRINT, ANALYTICS.VIEW_ASSIGNED. Expected active permission count: 13 .
ATTENDANCE_CLERK	Clerk users. They should see assigned section/work unit data only.	Same assigned-scope permissions as ATTENDANCE_AGM . Expected active permission count: 13 .
ATTENDANCE_EMPLOYEE	Normal employees. They should see their own attendance only.	MY_ATTENDANCE.VIEW_OWN, REPORTS.VIEW_OWN, OT_SUMMARY.VIEW_OWN. Expected active permission count: 3 .

Scope Rules

User Type	Expected Data Scope	Required Auth Setup
Admin	All attendance data, all reports, user/settings menu.	Assign ATTENDANCE_ADMIN .
AGM	Only assigned work unit/section data.	Assign ATTENDANCE_AGM and add UserWorkUnit rows.
Clerk	Only assigned section/work unit data.	Assign ATTENDANCE_CLERK and add UserWorkUnit rows.
Employee	Only own attendance, own reports and own OT.	Assign ATTENDANCE_EMPLOYEE and ensure EPF claim/mapping is available.

AGM and Clerk filtering depends on **UserWorkUnit**. Work unit IDs should match the ERP work space IDs used by Attendance employee data, such as **AGMWorkspaceId**, **DGMWorkspaceId** or **ServiceUnitId**. If a user has the role but no work unit assignment, they can log in but assigned data may be empty or limited.

Engineer Run Checklist

- Backup or confirm safe deployment window for hosted **CECB_Auth**.
- Open and review **SeedAttendanceAuthPermissions.sql**.
- Update local default URLs in the script if hosted **BaseUrl** and **UiUrl** should be stored in Auth.
- Run the script against hosted **CECB_Auth**.
- Assign Attendance roles to test users.
- Add **UserWorkUnit** rows for AGM and Clerk test users.
- Set Attendance API **CentralJwtSettings.SecretKey** to the same JWT secret used by central Auth.
- Restart Attendance API after configuration changes.
- Test login as Admin, AGM, Clerk and Employee.

Verification Queries

Run these after the seed script to verify created permissions and role mappings.

```

SELECT s.SystemCode, s.SystemName, s.IsActive
FROM dbo.[System] s
WHERE s.SystemCode = N'ATTENDANCE';

SELECT t.TaskCode, a.ActionCode,
       CONCAT(N'ATTENDANCE.', t.TaskCode, N'.', a.ActionCode) AS PermissionCode
FROM dbo.[System] s
JOIN dbo.[Task] t ON t.SystemId = s.SystemId AND t.IsActive = 1
JOIN dbo.[TaskAction] ta ON ta.TaskId = t.TaskId AND ta.IsActive = 1
JOIN dbo.[Action] a ON a.ActionId = ta.ActionId AND a.IsActive = 1
WHERE s.SystemCode = N'ATTENDANCE'
ORDER BY t.TaskCode, a.ActionCode;

SELECT r.RoleCode, COUNT(rta.RoleTaskActionId) AS ActivePermissionCount
FROM dbo.[System] s
JOIN dbo.[Role] r ON r.SystemId = s.SystemId AND r.IsActive = 1
LEFT JOIN dbo.[RoleTaskAction] rta ON rta.RoleId = r.RoleId AND rta.IsActive = 1
WHERE s.SystemCode = N'ATTENDANCE'
GROUP BY r.RoleCode
ORDER BY r.RoleCode;

```

Expected Role Counts

RoleCode	Expected ActivePermissionCount
ATTENDANCE_ADMIN	26
ATTENDANCE_AGM	13
ATTENDANCE_CLERK	13
ATTENDANCE_EMPLOYEE	3

Application Behavior After Setup

- Attendance UI reads roles and permissions from central login response/JWT and stores them as `roleList` and `permissionList`.
- Sidebar and routes hide or show menus by permission.
- Attendance API filters report and employee data by permission and user scope.
- Admin receives all data. AGM and Clerk receive assigned data. Employee receives own data.
- Existing attendance calculation rules, OT rules and check-in/check-out logic are not changed by this permission setup.
